ABOUT ME

Currently studying at and seeking an internship (LIA) as part of my education for the period January 13th - May 23rd, 2025.

I previously worked as a registered nurse and switched careers to follow my interest in programming and deepen my knowledge in software development. I am a quick learner with a particular interest in backend and embedded programming. I enjoy solving complex problems, both in teams and independently, and always strive to deliver efficient solutions.
